Align Graphic Objects in PowerPoint 2007

Graphic objects can be lined up horizontally or vertically -to the left, right, top or bottom -- in relation to each other or relative to the slide. It is a matter of a few simple steps in PowerPoint 2007.

<u>Click here</u> to know how to align graphic objects in PowerPoint 2007.

Prepared by Information Security and IT Governance Division of ICT. ProductivI.T.y showcases tips & tricks on various office and branch applications.

PowerPoint

Align Graphic Objects in PowerPoint 2007

1. Start by placing your mouse near the outer edge of one of the graphics and drag a window to surround all objects to be included in the alignment.

2. In the *Drawing* section of the ribbon, choose *Arrange* > *Align* > *[choose your alignment option].*

OUTPUT

Align Selected Objects: This will line up all the selected objects to the edge of the object, depending on the choice made, that is furthest on the slide.

Align Relative to Slide: This will use the slide boundaries or exact center of the slide, depending on the choice made.

Snap Objects to PowerPoint Grid or Other Objects: The Snap feature in any program makes the object jump to a specific location on the page as you drag it, to help you align it better with other objects or to a certain location on the page: Snap Object to Grid and Snap Objects to other objects.

Distribute Selected Objects, Relative to Each Other: This will distribute the total space between all the objects selected, from the outside edges of the two outermost objects.
