Productivl.T.y – For Internal Use Only

WHAT's New?

Change the Default Chart Font

Excel's chart allows text in many places – the title, legend, axis labels, and data series labels. You can change the font individually or set a default throughout your chart.

Read below to learn how..

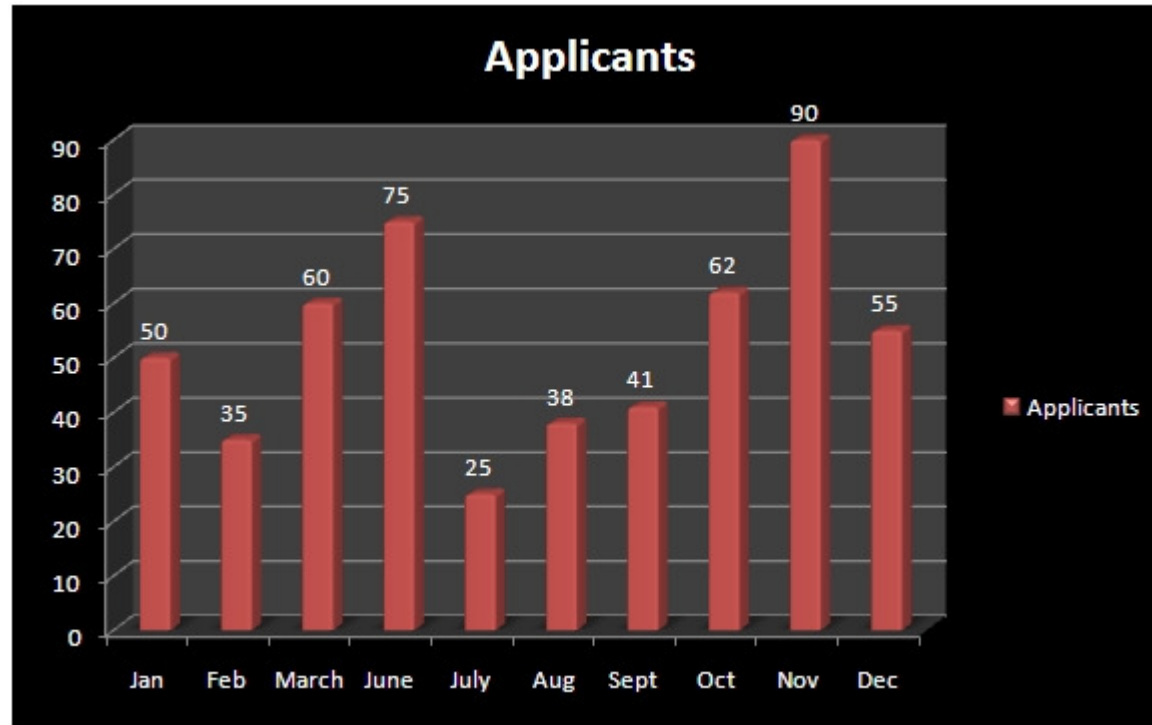

NOTE: Productivl.T.y is a regular email publication of Information Security and IT Governance under ICT. For comments and suggestions, kindly email: ict-process@pjlhuillier.com

Change the Default Chart Font

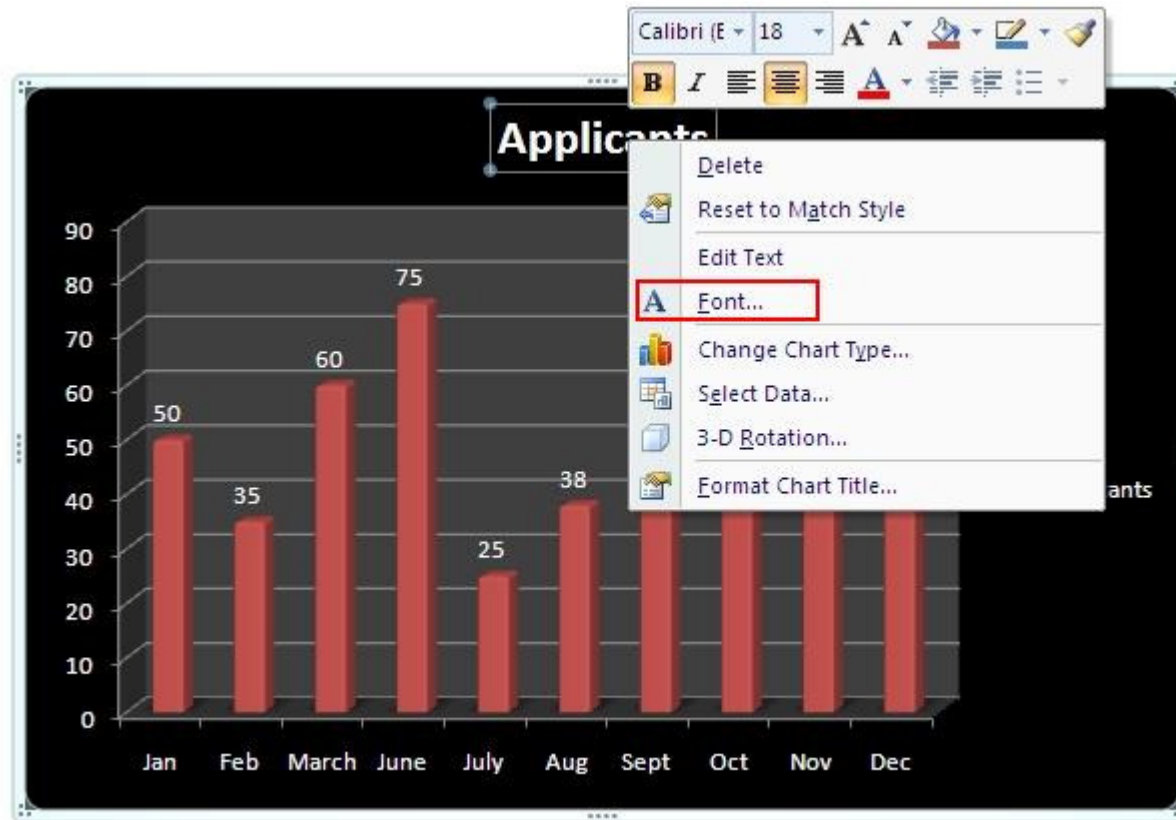

To change the font style individually:

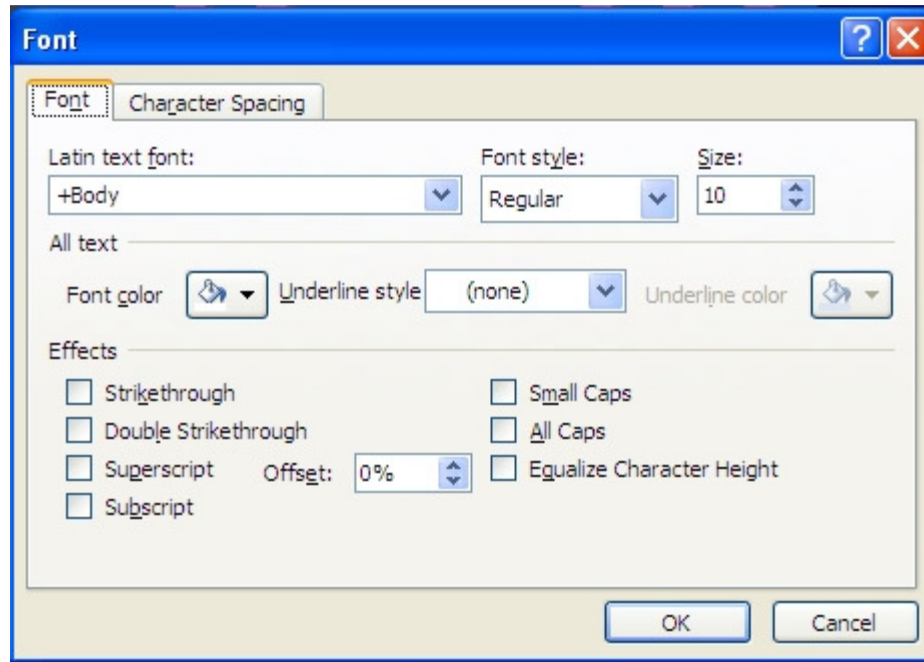

1. Select the text label that you want to change.

2. Right-Click the text and a formatting menu will appear where you can easily change the font style or you can select Font Menu for a more detailed formatting.

To set a default font style all throughout the Chart:

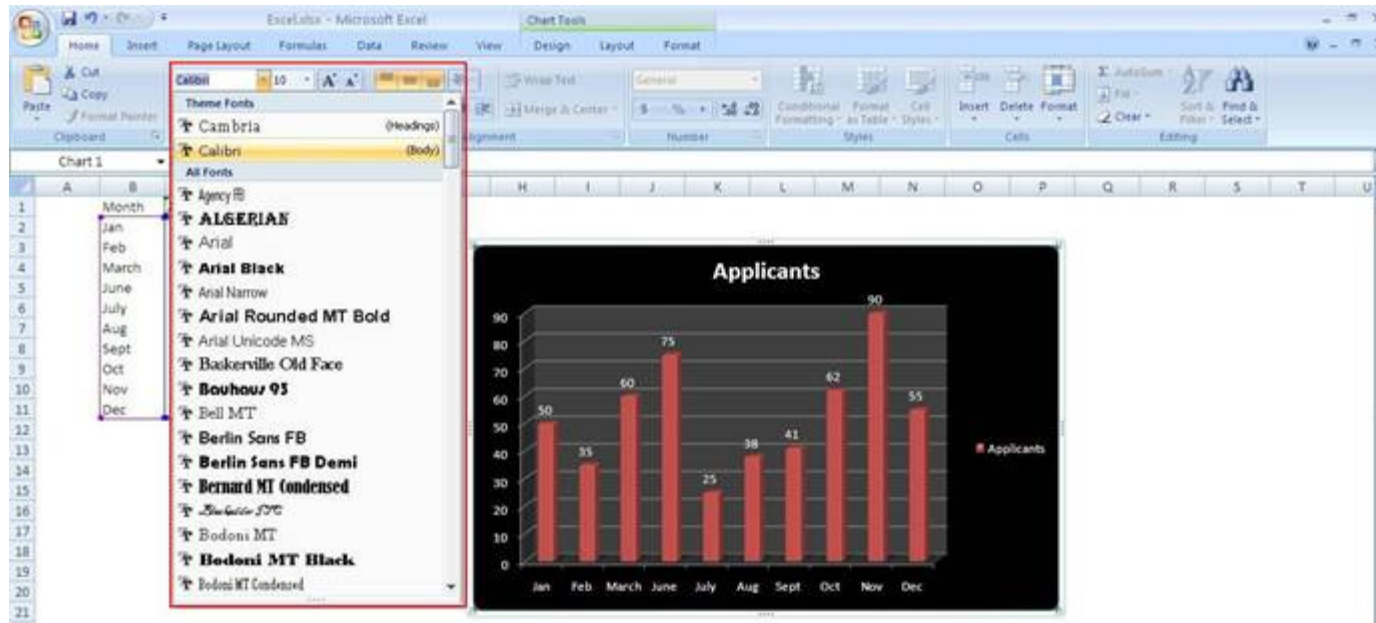

1. Select the whole chart by clicking the chart's border.

2. Go to the Home Tab

- In the Font Group, select a new font type from the Font dropdown list. The font in your entire chart changes to match the new font type.
