

Disable Image Compression in MS PowerPoint

By default, images in a slideshow are compressed upon saving, resulting in loss of quality. This is ok as it saves time specially when you want to run the slideshow on a website. But if you are preparing a presentation where quality of image matter, this feature becomes a problem.

<u>Click here</u> to view how you can disable the compression feature in MS PowerPoint.

ProductivI.T.y showcases tips & tricks on various office and branch applications.

PowerPoint

Disable Image Compression in MS PowerPoint

1. Click the *Office button*.

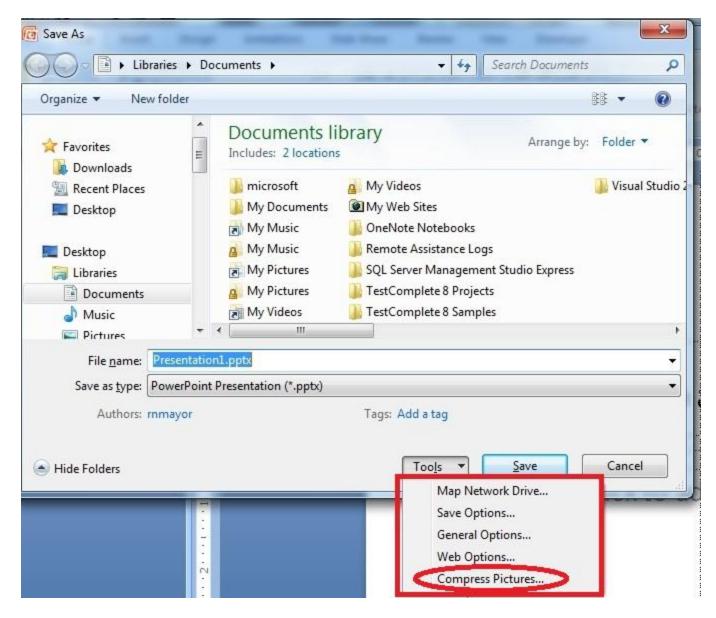

2. Click the *Save As > PowerPoint Presentation*.

ICTP_028_07102012 Page 2 of 6

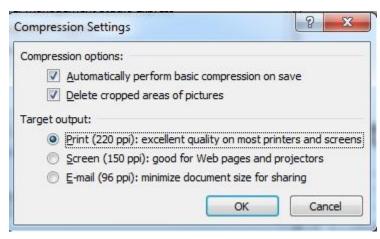

3. In the Save As dialog box, click Tools>Compress Pictures.

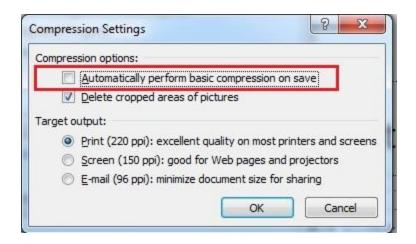

4. Compress Pictures dialog box will appear. Click Options button to open Compression Settings dialog box.

5. Under *Compression options:* menu, uncheck "Automatically perform basic compression on save". Click OK and save your presentation.

*Note: To revert the compression settings to its original settings, do steps 1-4 and under *Compression options:*, check *"Automatically perform basic compression on save"*. For new presentations, MS PowerPoint automatically compress images by default so you need to set it again and do steps stated above.
